Determine the Weight and Size

UPS Express® Freight

How to Determine Billable Weight

Compare the freight shipment's minimum billable weight, actual weight and dimensional weight. The greater of the three is the billable weight and should be used to calculate the rate.

Step 1

Minimum billable weight of a freight shipment is 71 kg.

Step 2

Determine actual weight and round up any fraction of a kilogram to the next half (0.5) kilogram.

Step 3

Determine dimensional weight by multiplying the item's length by the width by the height.

For each dimension, measure the largest distance, rounding each measurement to the nearest whole number. The result is the cubic size. Divide the cubic size by 5,000 when measured in centimetres. Round up any fraction of a kilogram to the next half (0.5) kilogram.
