Med 200

**UPS Temperature True® Packaging** provides pre-qualified packaging systems for your temperature-sensitive products at a competitive cost. We offer packaging options to protect products with a range of time and temperature requirements. Each solution has been tested and qualified to maintain appropriate temperature levels throughout the UPS domestic network, giving you peace of mind that your products will reach their destination with the quality intended.

Our Med 200 packaging system is an efficient, reliable solution ideal for next-day delivery to your customers.

- Components include a corrugate outer box with molded foam container, EPS pads, and gel paks
- Additional gel packs available and sold separately
- Three sizes offered
- Designed to withstand ambient temperatures in the domestic network; qualification data available
- Easy to assemble
- Available exclusively to UPS customers

**Specifications**
- Refrigerated
- Up to 2 days
- Qualified for the UPS domestic network

**Ideal for**
- Generics
- Consumer health
- Vaccines
- Compounding medicines
By partnering with leading global manufacturers of temperature-sensitive packaging, we can provide quick, convenient access to a wide selection of UPS Temperature True Packaging solutions. It’s easy to order. Here’s how:

- Contact your UPS Account Manager to discuss the option best suited for your products and place your order.
- If you don’t have a UPS Account Manager, visit ups.com/healthcare and click on the Request More Information button. We’ll contact you to answer questions and help place your order.
- Your UPS Temperature True packaging order will be shipped directly to you and billed to your UPS account.

It’s easy. Simply contact your UPS account manager or visit ups.com/healthcare today to order reliable, cost-efficient packaging designed specifically to protect your temperature-sensitive packages shipped via UPS.
