

October 11, 2021 Update

Rate update

As of December 26, 2021, the new rates for our services come into effect.

This rate change was defined considering inflation and the combination of the increase in the shipping rate and a reduction in Peak Surcharges where applicable, providing great value to customers. Additional information about the new rate changes will be available for download at [ups.com](https://www.ups.com) in December to help you plan for the coming year or you can approach your account executive for detailed information.

**The impact of these changes on your shipping costs will vary depending on your shipping characteristics, zones, and the terms of your UPS contract. The weighted average rate increase includes increases to base rates combined with reductions in certain applicable surcharges. The rate increase applies only in selected markets; For details on applicable rates, please refer to the UPS Rate and Service Guide in effect at the time of shipment.*
