UPS Temperature True® Packaging Services

Med 200

UPS Temperature True® Packaging provides packaging for your temperature-sensitive products at a competitive cost. We offer packaging options to help protect products with a range of time and temperature requirements. Each solution has been tested to maintain certain temperature levels throughout the UPS U.S. domestic network, helping to give you peace of mind that your products will reach their destination as intended.

The Med 200 packaging system is an efficient, reliable solution ideal for next-day delivery to your customers.

- Components include packing instructions, a corrugate outer box, a molded foam container and EPS pads or bubble wrap. Small and medium models include a product payload box
- Refrigerated models include gel packs. Additional gel packs available and sold separately
- Three sizes available with two levels protection for both refrigerated and frozen products
- Designed to withstand ambient temperatures in the UPS U.S. domestic network; qualification data available
- Easy to assemble

Med 200 Solutions

Frozen Shipping System

TEMP. RANGE	DURATION	PART NO.	SIZE	CAPACITY (L)	PAYLOAD DIMENSIONS (IN)		
					L	W	H
