How to Process Your Shipments (Continued)

DOMESTIC AND INTERNATIONAL

To determine the weight, zone, rate, and additional charges for your shipments, follow the steps below.

2. Determine the Weight

Domestic and International Shipments of Single Packages

Determine Actual Weight

The actual weight is the package weight rounded up to the next kilogram. (The first 10 kilograms of export services are rounded up to the next half kilogram).

Determine Dimensional Weight

Multiply in centimeters the length by the width by the height of each package, rounding each measurement to the next whole centimeter to determine the cubic size or volume.

Divide the cubic size or volume of the package by 5,000 to determine the Dimensional Weight in kilograms. Increase any fractions of a kilogram to the next half kilogram.

Compare the package's Actual Weight to its Dimensional Weight. The greater of the two is the Billable Weight and should be used to calculate the rate. For multiple package shipments, total the Billable Weight of all packages in the shipment.

Global Price per Shipment

When multiple packages are shipped to a single consignee on the same day andare listed on the same UPS Air Waybill or Shipping Label, a shipment is considered to be one shipment whose weight is equal to the sum of the Billable Weight of all the packages that make up the shipment. The rate is called the Global Price per Shipment.

Global Price per Shipment does not apply to UPS Express Envelopes because they cannot be part of a UPS Express shipment. The Global Price per Shipment applies to all your domestic shipments and to all your export and import shipments.

International Palletized Shipments on UPS Worldwide Express Freight™ Midday and UPS Worldwide Express Freight®

Shipping rates are based on the shipment weight, including the weight of the pallet, size, and origin-to-destination distance (refer to page 23 for Export and 30 for Import). Billable weight is the weight used to calculate the rate.

The billable weight will be the greater of the dimensional weight as compared to the actual weight and the minimum billable weight.

Determine Actual Weight

Actual weight is the weight of the items on the pallet and the weight of the pallet rounded up to the next whole kilogram. Use a scale to determine the weight and round any fraction to the next whole kilogram.

Determine Dimensional Weight

Dimensional weight reflects pallet density, which is the amount of space a pallet occupies in relation to its actual weight. Dimensional weight may apply to all UPS international package services.

Determine the pallet dimensions in centimeters. Measure the length, width and height in centimeters, rounding each measurement to the nearest whole number (for example, 1.00 to 1.49 will be considered 1, and 1.50 to 1.99 will be considered 2).

Multiply the pallet length by the width and by the height. The result is the cubic size in centimeters. Divide the cubic size by 5,000 to determine the dimensional weight. Increase any fraction to the next whole kilogram.

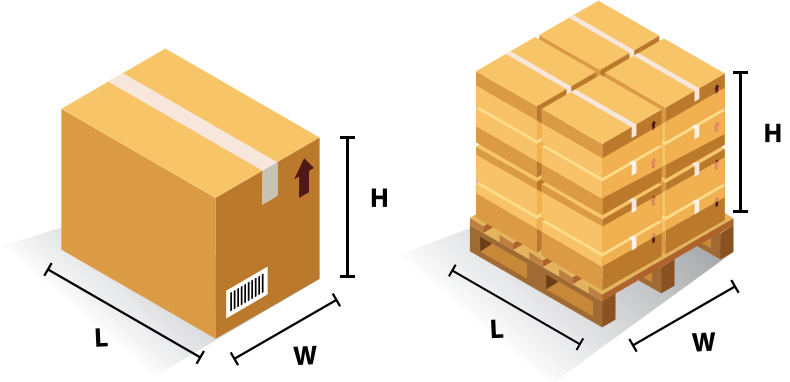

Determine Billable Weight

Compare the actual weight of the pallet with its dimensional weight and minimum billable weight. The greater of the three is the billable weight and should be used to calculate the rate. Note that there is a minimum rate for these services

Dimensional Weight =

$$\frac{L \times W \times H}{5{,}000}$$

L = Length in centimeters
W = Width in centimeters
H = Height in centimeters

This service is available in selected cities and Postal Codes. See pages 6-8 and 13 of this Rate & Service Guide. The rates in this chart are published in Mexican pesos and include V.A.T. and are subject to fuel surcharge and other additional charges as shown on page 37 of this guide.

For shipments weighing more than 45 kg.

For shipments weighing over 45 kilograms, the rate is calculated by multiplying the shipment weight (rounded up to the next full kilogram) by the corresponding price per kilogram shown at the bottom of the Rate Chart. To this result, add MX$126.21 for UPS Express Plus.

The amount billed will be the result of this calculation or the Minimum Rate indicated, whichever is greater.

UPS Express Plus shipments may be subject to the Warsaw Convention, including its limitations on legal liability.

+ For Letter shipments weighing more than 0.5 kg, the published rate for the corresponding weight will apply.

Note

Any fraction of a kilogram is rounded up to the next higher weight.
