## UPS Hundredweight Service®

An ideal alternative to traditional LTL (Less-Than-Truckload) service for multiple-package shipments weighing less than 1,000 pounds, UPS Hundredweight Service is designed for shipments UPS classifies as Less-Than-PalletLoad<sup>SM</sup>. With Hundredweight Service, there's no need for pallets, no extra charge for guaranteed on-schedule delivery, and no worries, as each package has its own address label and unique tracking number.

### How to Determine the Charge

1. Choose the UPS service option (Next Day Air, Ground, etc.). Refer to your UPS Zone Chart to determine the appropriate zone.

2. Determine the shipment's billable weight by totaling the billable weights of the individual packages in the shipment.

3. For UPS Next Day Air®, UPS Next Day Air Saver®, UPS 2nd Day Air A.M.® and UPS 2nd Day Air®, multiply the shipment's billable weight by the Rate Per Pound shown on the rate chart for the appropriate service, shipment-billed weight level and zone to calculate the shipping charge.

For UPS 3 Day Select<sup>SM</sup> and UPS Ground, divide the shipment's billable weight by 100 to determine the number of Hundredweight units. Multiply the number of Hundredweight units by the Shipment Rate Per Hundredweight Unit shown on the rate chart for the appropriate service, shipment-billed weight level and zone to calculate the shipping charge.

#### UPS Hundredweight Service Qualifications

- Packages addressed to a single consignee at one location within the 50 states on the same day.

- Total shipment billable weight of 100 pounds or more for each UPS Next Day Air, UPS Next Day Air Saver, UPS 2nd Day Air A.M. or UPS 2nd Day Air shipment.

- Total shipment actual weight of 200 pounds or more for each UPS 3 Day Select or UPS Ground shipment.

Some shipments less than 500 pounds may be more economically rated as 500 pounds. The UPS billing system will automatically compute the shipment charges at both the shipment-billed weight and at 500 pounds, compare them and bill the lower of the two.
