Proof-of-delivery, when and where you need.

UPS Complete View® Confirm enables you to access the delivery details of your past UPS shipments. We know that some of your customers and vendors are demanding accountability, and we are helping you respond.

Meet customer expectations
Large retailers are requiring the vendors to provide proof-of-delivery when they need it; and this is often long after the final delivery has been made. UPS Complete View® Confirm helps you meet these demands.

The security of knowing that you can provide your customers with proof-of-delivery ensures that your accounts stay on-track.

Secure data storage and fast retrieval
UPS, through its arrangement with Parcelink, Inc, provides a safe and secure storage facility for your previous shipment data. The highest levels of encryption protect your sensitive information.

Long-term and round-the-clock access
UPS provides you with access to delivery information through a secure, web portal that is dependable and readily available.
Combine invoice and proof-of-delivery

UPS Complete View® can be your conduit to matching your accounts receivable with your shipping and delivery information. Some benefits include:

• Retrieve invoice data from your systems
• UPS package tracking and delivery information is archived
• Signature scans (if captured and required) are also available for retrieval.

Paperless

UPS Complete View® Confirm helps support your environmental goals by being entirely paperless. Your proof-of-delivery, invoice and signature scans are provided in one document that can be e-mailed to your customer, vendor, or wherever you need that information delivered.

Secure Support

UPS Complete View Confirm relies on the support of ParceLink Systems, Inc. ParceLink has worked closely with UPS to create quick and responsive systems and data storage options for UPS customers for the past 17 years.

These systems are customized solutions specific to UPS customer requirements. Our visibility to your customers is transparent, at the end of the day they will feel as if they were dealing with UPS directly.

Working through UPS’s Customer Solutions team, ParceLink has develop customized solutions that meet your logistics needs.

Conduct business without limitations

Interact with any customer, supplier, vendor or retailer by providing invoice, and proof-of-delivery with signature (if captured).

UPS Complete View® Confirm provides a platform that saves you time, money, and needless hassle. It’s easy-to-use, and provides you all of the information you need to prevent financial loss.

UPS Complete View™

For more than 100 years we have been getting to know how businesses just like yours need to work, how adaptable they need to be and what tools they rely on to get the job done.

So we put all of those lessons learned into one place, and made them available to you. Let us introduce you to a comprehensive suite, UPS Complete View™

Within the suite are the information, tools and power that you need to manage your business and reach new heights.

With the suite of solutions, alone or working together, you can take control of your billing, access your past shipping information, manage and process your shipping using a enterprise-wide set of rules, keep informed about what shipments are in transit, and be sure that the intended recipient received your shipment.

It’s time for you to get the visibility you need and for your business to take off.
