

UPS Temperature True® Packaging Services

Specifications

Cool

Up to 2 days

Qualified for the
UPS domestic network

Med 100

UPS Temperature True® Packaging provides pre-qualified packaging systems for your temperature-sensitive products at a competitive cost. We offer packaging options to protect products with a range of time and temperature requirements. Each solution has been tested and qualified to maintain appropriate temperature levels throughout the UPS domestic network, giving you peace of mind that your products will reach their destination with the quality intended.

Our Med 100 solution features insulated envelopes and PolarPack gel packs. It's a lightweight, environmentally-friendly, and economic alternative for the safe shipping of your products that require cool temperatures in transit.

- 100% biodegradable, light-weight envelopes feature a waterproof outer surface with permeable liner and ultra-insulating pad
- Three standard sizes qualified to withstand ambient temperatures in the UPS domestic network
- Easy assembly; additional gel packs are available and sold separately
- PolarPack gel packs provide a durable, non-toxic, reusable and economic alternative to wet ice

Ideal for

Generics

Diagnostic specimens

Compounding medicines

Single-dose medicines
