UPS Shanghai Facility

Adding to a growing network, the new Shanghai facility is the fourth in the Shanghai area, increasing UPS’s capacity and reach into China. This network is backed by the trusted UPS brand and leverages UPS’s global logistics expertise to simplify U.S.-to-China distribution, allowing you to penetrate emerging inland markets. Complemented by end-to-end processes and innovative technology, UPS is helping you expand with ease.

UPS FACILITIES PROVIDE THE FOLLOWING ADVANTAGES:

- **Emerging Market Access** — Strategic locations within the UPS network give you access to transportation, brokerage and distribution resources that help you get the right products to the right customers at the right time.

- **Sophisticated Technology** — With our powerful and secure IT platform, you get the global visibility for precision planning and execution as well as the flexibility to change things when demand shifts.

- **Asset-Light Scalability** — Help reduce your cost and capital investment. Our worldwide network gives you a global presence instantly, without investing to build your own. UPS’s multi-client facilities allow you to reduce supply chain costs while serving new markets.

- **Expertise** — Our integrated source-to-customer solutions designed by our highly skilled logistics resources — including transportation, distribution, trade management and value-added services — create a single point of contact across the supply chain, streamlining operations to give you peace of mind when expanding into new markets.
